Crescendo event - tables

We developed a smart and cost effective variant of Crescendo table system.

The tabletop is made of 4,8 mm wax treated board, framed with the groove and tongue joint as ordinary Crescendo and it also has table foldable legs.

The tables are 1600 x 800 mm and the table extensions are 1200 mm.

Here we have joined two tables together with legs and a table extension and immediately we have a very durable device with dimensions 4400 x 800 mm.

When setting up a long table it is only necessary with table legs for every second table.

Crescendo event benches

Our benches are built on the same idea as the tables. Two benches and a transition piece gives a stable bench unit. The transition pieces are available in a variety of sizes.

The benches attach together with the mounting latch stored under the bench when not used.

The benches are stackable and are available without leather seat.

On a surface space of approx. 1700 x 900 mm seats for about 100 people are stored.
