TIME FOR CHANGE

we choose crescendo system

DANNO STERNAD, RESTAURANT OWNER:

“We increased capacity by thirty percent”

Crescendo Table System makes it easy to vary and increase capacity in a restaurant or other venue.

- Ingenious, sound, simple - an investment that quickly pays off.

“With Crescendo Table System you can furnish your venue just as you want it and in a simple way”, says Danno Sternad. It lets you fill gaps with loose table-tops instead of entire tables, which allows setting over the joints and thereby provide more places.

Corner tables, extended tables, round tables, tallbar tables -all with superb stability.

Danno Sternad at the show venue and ice hockey restaurant Mamma Mia in Örnsköldsvik knows what he's talking about.

With Crescendo he has space for an additional thirty customers - an increase of thirty per cent - when the Mamma's Salong show is on, which is always a sell-out.

Just like many of his colleagues, Danno needs to be able to quickly change the size of his tables in a flexible way.

“We save time with Crescendo System because it's easy to manage and you can do the job alone.”

The tables are available in many different categories of quality, from luxurious to more simple models. The insertable boards are easy to store when not in use.

You don't have to buy new ones

You can have the tables custom-made for your restaurant. But you can even use the table stands that you already have.

The Crescendo System - for which a patent application has been made - is the flexible table system for restaurants, pubs, conference centres and other venues that need to be able to set out their tables in a flexible way.

1 Separate tables during the day. But tonight more space is created with a longer table.

2 It's easy to put together on your own with a few simple attachment fittings – and you don't have to clear the table first.

Since this picture was taken, Danno has shift to Crescendo System chairs and refurnish to round tables.

(Small picture above)

Visit www.crescendosystem.com

Look at the film showing Restaurant Mamma Mia changing from separate tables to long tables.

3

The insertable boards can easily be fitted in between two tables.

4

And soon you have a stable, long table for a larger number of guests!

Bredbyns
Gästgiveri
Bredbyn

Bredbyn Gästgiveri has chosen
Crescendo System in their
dining rooms.

This is a very clever storage of table tops not in use for the day. With special made storage trolleys they hide the table tops. Takes much less space then whole tables.

With Crescendo Systems wall strip, the systems flexibility increases.

Visit www.crescendosystem.com and look at the films for more ideas.
